

Killed By Lightning Near Neapolis.

Farin Home Completely
Destroyed by Fire

During the storm on Tuesday night, the house of Mr. Reuben E. Moseley, farmer, east of town, was struck by lightning and Mr. Moseley instantly killed.

The storm commenced about 11 p.m. and Mr. and Mrs. Moseley were downstairs, not yet having retired for the night, when their four children who were upstairs in bed, were awakened by the storm and became frightened. Mr. Moseley had gone upstairs to quieten the children when lightning struck the house and he was instantly killed but the children were not harmed.

Fire broke out and Mrs. Moseley rushed upstairs with her baby in her arms, dragged her husband out of the house and saved the children.

There was no telephone at the house but Mr. Neufeld, a farmer, observed the fire and called up the neighbors who were quickly on the scene. In spite of their untiring efforts, the house and contents were totally destroyed. Mrs. Moseley and the children were taken to a neighbor's, where they are being cared for.

The children, aged thirteen, eleven, nine, seven and three, are left without clothing and other effects. All those caring to donate clothing or other comforts, will find the Red Cross Society under the direction of W. A. Austin, Didsbury, willing to receive and distribute same.

Alfalfa is Grown Here in Didsbury

Alfalfa can be grown in this district. Anyone doubting this statement should call at the Atlas Lumber Company and see the sample that is being displayed at their office. Mr. C. F. Dooley, realizing the value of this great fodder crop, sowed an experimental crop on a plot of land in town. The plot was sown late in June, 1928 and last week cut alfalfa which measured three feet long.

Mr. Dooley claims that late June is about the best time to sow alfalfa in this country, that it should be sown on clean land and that it is advisable to inoculate the seed. From six to ten pounds of seed per acre should be sown and seed can be obtained from twenty cents to twenty-five cents per pound, much cheaper than in former years.

Many who have tried to grow alfalfa here, claim that it winter-kills but according to Mr. Dooley, there is little danger of winter-kill, if handled properly. In the northwest, one of the most common mistakes made, after a stand is secured, is to leave the field bare by late cutting. Alfalfa must have a good heavy blanket for the winter and there should be a growth of eight to ten inches left for protection. Alfalfa should not be cut later than twenty days from the last killing-frost.

A surprise party was given at the home of Mr. and Mrs. Wm. Imm, in honor of Mrs. Imm's birthday. The evening was spent in music and card-playing, prizes being won by Mrs. H. Pearson and Mr. H. Roberts and consolation prizes by Mrs. Ellis Barnes and Mr. I. Haynes. A delicious lunch was served and the guests departed for home after having spent a very enjoyable evening.

LOCAL & GENERAL

Little Evelyn Miller is spending the week with her grandma, Mrs. D. Irwin.

Ralph Honey took part in the horseshoe tournament at the Edmonton Exhibition last week.

Mr. Richard Schaefer and son of Ponoka were visiting Mr. Sanderman last Thursday.

Mr. and Mrs. W. J. McCoy and Jessie, Mr. and Mrs. W. J. Hilliard and Mr. and Mrs. N. S. Clarke are vacationing at Banff this week.

Mr. and Mrs. Henry Stevens of Winona, Minn., and Mr. and Mrs. J. E. Brown of Altura, Minn., were visiting their sister, Mrs. W. E. Cuffling this week.

Mr. and Mrs. Dave Irwin, Mrs. Irwin's son, H. O. Davies, Mr. and Mrs. W. J. Scheidt and Mrs. Jack Cummings and children motored to Sylvan Lake on Sunday.

Mr. Alfred Speakman, U.F.A. candidate in Red Deer federal constituency, will address a meeting at Zella schoolhouse on Friday afternoon, July 25th, also at 8-30 p.m., same date at the Didsbury Opera House.

Miss Nohr wishes to announce that her sister, Miss Tina Nohr of Calgary, specialist in permanent waving, will be in Didsbury next Monday and Tuesday, giving permanents. Phone 151 for appointments, before Saturday. Prices reasonable.

Mr. W. J. Wilkinson of Peace River Crossing, spent a few days in the district this week. While here, he purchased six head of pure-bred Scotch Shorthorn cows and heifers from Mr. W. Lyons, east of town. The cattle will be shipped to Peace River this week-end.

Mr. Leo Smith, Mus. Bac., F.R.M.C.M., who has been examining pupils in the west for the Toronto Conservatory of Music, was a visitor in Didsbury this week. While in Alberta, Mr. and Mrs. Smith were the guests of Mae Studer Campbell in Calgary and Miss Evelyn Liesemer in Didsbury, both of whom studied the violin-cello for three years under Mr. Smith in Toronto.

BIRTHS

W. J. Botterill Speaks at Didsbury.

The first political meeting in the Federal Campaign was held in Didsbury on Tuesday evening, when the Conservatives held a meeting in support of their candidate, Mr. W. J. Botterill.

Mr. H. W. Chambers occupied the chair and introduced Mr. W. J. Payne K.C., who spoke briefly in favor of the candidate. Mr. Botterill was well received and spoke forcibly for an hour on the issues of the campaign.

M.B.C. Camp Meeting

The Annual Camp Meeting which closed on Sunday night proved to be a great blessing, bringing a spiritual uplift not only to the church but to the community. We believe this camp meeting was one of the best ever held in Didsbury.

Rev. Bennard's ministry among us was very much appreciated. The interest and attendance of the people in the surrounding community also greatly added to the success of the meeting. The children's services were the scenes of much activity, the attendance ranging from sixty-five during the week to nearly one hundred on the Sundays.

There were four-thousand-five-hundred meals served during the ten days. Financial needs of the camp were all met by donations and the offerings of the people.

We feel very grateful to God for His special blessing which resulted in the salvation of many souls.

—Contributed.

Mr. H. O. Tonjum motored to Morrin on Sunday.

Mrs. Dr. Clarke and family are visiting friends at Edmonton, this week.

Mrs. A. G. Studer, Miss W. Studer, Mrs. W. G. Liesemer and Miss Evelyn Liesemer left on Tuesday to spend a holiday at Sylvan Lake.

Didsbury Fair Next Tuesday & Wednesday

The Twenty-seventh Annual Didsbury Fair and Exhibition will be held Tuesday and Wednesday next. It is expected the livestock and agricultural exhibits will exceed those of any previous years and from entries already received, the ladies' section for fancy-work and domestic science will make a particularly good showing.

This year, the directors had an innovation and decided to hold a two-day Fair. All exhibits will be in place Tuesday morning and judging commences at 1-30 p.m.

On Wednesday, in addition to the exhibition, there will be a good program of horse races, including running races, Roman races and relay races. A softball tournament in which town and country teams will compete and a horseshoe tournament have also been arranged. Athletic events and children's sports will complete an afternoon's good program.

The directors have made arrangements with the Jesse Stanley Amusements Co. and midway attractions and merry-go-round will be in full swing on both days.

On Wednesday evening at 6 p.m., a baseball game will be played on the ball-grounds east of the C.P.R. tracks, between Didsbury and the Calgary Oldsmobile Highfliers. At the Opera House, talking-pictures will be screened from 6 to 9-30 p.m., after which a big dance will be held.

Didsbury has the reputation of holding the best agricultural exhibition and fair of its class in the Province and events of this nature tend to raise the quality of livestock and agricultural products of the district. All the farmers in the locality and all the townspeople should endeavor to keep up this reputation.

Entries for the exhibition close on Saturday night, July 26th.

The W.C.T.U. will serve hot lunches in the grounds on Fair Day.

Canadian and World Progress

The above is the main heading of an article in the current issue of Toronto Saturday Night dealing with the present economic situation. The sub-headings to the article state: "Dominion's Rate of Advancement Far Above Other Nations—Favorably Situated To Share Again In Progress."

Because, owing to the present temporary depression in Canada, as throughout the world, but fortunately less acute in this country than elsewhere, there is a tendency on the part of many people to become unduly pessimistic, it is perhaps well to pass on some excerpts from this very illuminating article in the Toronto paper:

Economic life is ever in a state of flux. The fortunes of nations are affected by some radical change which may raise or lower their status among the powers. Business men find themselves drawn into the current of new demands and competition, through which the most careful navigation is necessary. Even persons in the most humble circumstances and those who for one reason or another are not engaged in active work cannot fail to notice how their living habits are altered over a period of time.

The most recent period of prosperity probably lends itself to more thorough analysis than any other; for one reason, because from the data available we can more accurately measure the forces employed; we can well determine the degree of economic recovery from the most disastrous conflict in history. Ten years ago the receding tide of war influences left a mass of economic disorder, inflation of credit and currency, severe depression in commodity prices, unstable political conditions, an enormous weight of debt and taxation and serious labor troubles—these were but a few of the difficulties which faced world business.

The economic forces of the world were finally mobilized along the broadest front ever occupied by an army of workers. The ensuing advance was not uniform the world over; the United States, Canada, France and Argentine swept ahead of other countries, but progress was made almost everywhere on the globe, and in this period of intense economic activity world production reached a record level.

An analysis made by the Canadian Bank of Commerce bears out this statement. An interesting sidelight in that analysis is a comparison between the progress of Canada and that of the world as a whole. It should not be taken for granted that Canadian production of basic commodities exceeded that of every other country, but it is a proven fact that the rate of increase in Canadian production exceeded that of the world by a wide margin in many of the most important branches of economic life.

This advance of Canada was so rapid as to place her among that small group of nations which enjoys a highly diversified economic organization, and one which has a broad field of opportunity for the application of agricultural and industrial science and the direction of business into the safest channels.

Consider a few figures. Between 1925 and 1928, world wheat production increased 13 per cent., but in that same period Canadian wheat production increased 35 per cent. Coarse grains production increased in Canada 21 per cent., as compared with a world increase of only 5 per cent. Coal production—world increase, 5 per cent., Canada, 33 per cent. Oil production—world increase, 24 per cent., Canada, 88 per cent. Lead production—world increase, 11 per cent., Canada 32 per cent. Copper production—world increase 18 per cent., Canada, 81 per cent. Pig iron production—world increase, 14 per cent., Canada 81 per cent. Steel production—world increase, 20 per cent., Canada 63 per cent. Automobile production—world increase, 7 per cent., Canada 66 per cent. Paper production—world increase 9 per cent., Canada, 31 per cent. Aluminum production—world increase 15 per cent., Canada, 125 per cent. Artificial silk—world increase, 103 per cent., Canada, 217 per cent. Water power developed—world increase, 17 per cent., Canada, 43 per cent. Foreign trade (value), world increase, 3 per cent., Canada, 26 per cent.

The foregoing cannot, of course, be accepted as a complete registration of the world's economic activity, nor should it be regarded as painting a picture of unalloyed prosperity; perhaps it goes without saying that the world has not yet reached that ideal state where the work of all its people can be accurately recorded, and where this work will be in such perfect form that none shall struggle against difficulties or suffer distress.

In the current year we see the aftermath of some misdirected economic effort, and of the greatest speculative boom in history. But, whatever the actual demand is today, the world's needs must eventually go on increasing, and its present great productive capacity will be called into active play when the present period of unsettlement is over and the stage is again set for prosperity. As for Canada, her imposing record of progress achieved in the brief space of the last four or five years gives but a hint of her potential power, and of the position which, by the development of her natural wealth, she can take when world progress is resumed.

Tribute To Dr. Eckener

People Take Vistas Of Graf Zeppelin As Matter Of Course

A writer in the New York Evening World says: "It is interesting, as showing what has happened with regard to this 'air-mindedness', that is so often spoken about, that the Graf Zeppelin, fighting the worst weather that it has ever encountered, caused the smallest stir by its arrival here that it ever caused. People now take it for granted that it will arrive safely and sail safely on schedule, just as they take it for granted that the "Europa" will arrive and depart safely and on schedule, or the "Bremep," or the "Berengaria." She has become, in the minds of the American people, a sort of aerial liner, a little more exciting, no doubt, than an ocean liner, but in pretty much the same class. Dr. Eckener, then, if he is a reflective man, will realize that this matter-of-fact acceptance of his presence was perhaps the highest tribute to him and to his ship that could be paid. People no longer wonder about the Graf Zeppelin, but realize that regular air transport over the Atlantic is now a reality.

Some credit to Mr. Hoover as a prophet, it seems to us, is due in this connection too. It will be recalled that quite casually, before any of us had ever seen the Graf Zeppelin, he said that regular airship travel across the Atlantic would come in a few months. Well, here it is.

PALE FACES JADED NERVES

Due To Weak, Watery Blood

Anaemia — impoverished blood — comes so stealthily that it is often well advanced before recognized. Fatigue and discomfort the earliest manifestations of the trouble are seldom taken seriously. Soon the face becomes pale; the nerves jaded; the heart palpitates violently after the slightest exertion; the appetite becomes fickle and before you realize it you are in a terrible plight.

At such time, by enriching and purifying the blood Dr. Williams' Pink Pills will build up the nerve cells and correct the run-down condition. Concerning them Miss Margaret Torrey, Toronto, Ont., says:—"I suffered a complete breakdown. My heart would palpitate on the least exertion. Nothing I ate agreed with me. I started taking Dr. Williams' Pink Pills and by the time I had taken several boxes I was ready for anything; I had gained in weight and every distressing symptom had left me."

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

British Columbia Head Lettuce

Head lettuce is moving from the Armstrong fields, and it is said that the acreage will provide shipments totalling between 30 and 40 cars; the movement being greater this year than last.

Persian Balm creates lovely complexions. Velvety smooth. Cools and relieves the skin. Makes it delightfully soft-textured. Alluringly fragrant. Delightful to use. Swiftly absorbed by the tissues, imparting that elusive charm so distinctive of the dainty woman. Persian Balm protects the delicate skin. Preserves and enhances the loveliest complexion. Every discriminating woman should use this silvery lotion. It is unrivalled as a flawless aid to beauty.

Most Costly Lightning Stroke

The costliest lightning stroke known was that which struck the U.S. Naval Ammunition Depot at Lake Denmark, N.J., in 1926, resulting in the loss of 31 lives and damage amounting to \$93,000,000.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

And Sixty Days

There is a story about a man who lay down among the victims of a train wreck that he might claim damages, and now Glasgow reports a man who was hurt in a fight and was taken to the hospital along with those hurt in a tramway accident. He got £10 damages from the company and 60 days in jail when the fraud was discovered.

Use Minard's for Rheumatism.

English Language Spreading

American Books Have Extensive Market In Foreign Countries

The wide and growing prevalence of the English language is attested by the fact that countries to which our tongue is that of a foreigner take high rank among the purchasers of books published in the United States. The Department of Commerce supplies the information that American books have an extensive market in foreign countries. While naturally the United Kingdom and Canada supply the largest number of readers, the country that stands third in the purchase of books made in the United States is China. Latin America and the Philippines take large numbers. That the third best customer for books printed in the English language is China shows how widely the English language is spreading, and with it, of course, Anglo-Saxon culture.

Asthma Can Be Cured. Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

New Baby Auto

Automobile Being Made To Sell At \$200 In United States

It is stated that General Motors have under construction a small four-cylinder automobile along the lines of the English Austin, which will retail in the United States at around \$200. Patterns are being made in Detroit for the new radical design, which is expected to greatly extend the ownership range of the automobile, and to boost business, which has fallen off seriously in the higher-priced models. Details of the new motor car are being jealously guarded.

Minard's Drives Away the Headache.

Speed Boat Shipped

British Girl Has Entered Craft For International Trophy

"Estelle V.," the motor boat with which Betty Carstairs hopes to establish a new record at Detroit, was shipped from England on the White Star liner "Calgaric," accompanied by five mechanics. From Halifax the boat will be shipped by Canadian National Railways to Gravenhurst, Ontario, where it will be tuned up in the Muskoka Lakes before the Detroit races.

As a result of Major Segrave's death, Miss Carstairs will be the only British entrant for the international trophy.

Coal Movement Arranged

Everything Ready For Shipments From Alberta and Saskatchewan Into Manitoba

All administrative arrangements in connection with the movement of Alberta and Saskatchewan coal into the Manitoba market under the recently granted subvention to aid in the ousting of imported fuel, are now completed, it was stated by Frank G. Neate, secretary of the Dominion Fuel Board, Ottawa. Mr. Neate was in conference, at Winnipeg, with operators from Alberta and Saskatchewan and also with distributors and railway officials.

"The machinery is all set up to handle the administrative work, the co-operation of the railways has been secured and the operators and distributors understand what is required of them," said Mr. Neate. "With the weapon now in their hands with which to combat the importation of foreign coal, it now is up to the coal people to use it."

A Prime Dressing For Wounds. — In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

After 62 years of waiting the congregation of St. Michael and All Angels' Church, Helensburg, Scotland, have just decided to complete the erection of the uncompleted church tower.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

There is probably no other modern development of astronomy that has so revolutionized the science as the application of photography.

Nearly One Billion Dollars Invested In Electric Power Stations Throughout Canada

Nearly one billion dollars was invested in central electric power stations in Canada at the end of 1928, or \$956,919,603 to be exact, according to an official report issued by the Canadian Government Bureau of Statistics. This is twice the amount of the investment in this industry in 1920 and over \$90,000,000 more than the total in 1927. An indication of the importance taking place in electric power developments throughout Canada and the amount of capital being invested, is given by the statement in the report that the total of \$956,919,603 was a larger capital expenditure than the railways of Canada reported for 1928.

The rapid growth of the pulp and paper industry in the Dominion in recent years has been an important factor in the growth of central electric power stations. In the year under review, the electric motors in the pulp and paper mills of Canada had a rating of 859,017 horse-power or 36 per cent. of the total rating of all such motors in manufacturing industries and mines, an increase of 520 per cent. since 1920.

Central electric power stations in Canada in 1928 produced 16,337,804,000 kilowatt hours, an increase of 12 per cent. over the output in 1927, and 177 per cent. compared with the 1920 output.

The number of customers who purchased power from the central electric power stations was 1,464,005, an increase of 82,037 over 1927. Only 1.6 per cent. of the electric power produced in the central stations is from fuel plants. Water power is among the principal of Canada's natural resources. There is available 20 million horse-power at ordinary minimum stream flow throughout the year rising to over 33 millions for at least six months of the year. To date only about 5,500,000 horse-power have been harnessed.

Compared with other countries, Canada stands second only to the United States in turbine horse-power installation, and second in turbine horse-power installation per 1,000 of population, Norway alone being higher. On a per capita basis Canada has nearly five times the installation of the United States.

There is now scarcely a village in Canada that does not enjoy the advantages of electric power. In British Columbia, for each 100 of the population, 18 families are using electricity for lighting their homes; for all Canada the average is 14.5. This means, reckoning 4.63 persons to a household, that over two-thirds of the homes in Canada, rural and urban included, are using electricity for lighting and other domestic purposes.

Using British Typewriters

Four Now In Offices Of Mounted Police, At Regina

The British preference has made its show in the equipment of the R.C.M.P. offices in Regina. There are now four high grade typewriters made in Great Britain, used in the R.C.M.P. offices.

It is said by those that use the machines that they compare in price with the cheaper United States machines, and in performance with the best machines manufactured in the United States. The typewriters have strongly built frames, and though displaying a slight variation to the standard machine manufactured in the United States, have the standard keyboard.

"Let's go for supper to the 'Three Sparrows.' The other day I found a collar stud in the soup."

Demurrage Would Be Heavy

Thousand Dollars a Day Against Zeppelin If Behind Schedule

Demurrage charges at the rate of \$1,000 a day would have been charged the Graf Zeppelin for every day she was behind schedule arriving at Lakehurst. The schedule of charges was arranged specially for this trip of the Graf Zeppelin. Besides the pre-arrival demurrage, there was a \$3,000 fee for preparing for the big ship's care at Lakehurst, and refueling cost \$2,000 a day besides the cost of the fuel. After refueling was completed, \$1,000 a day would have been charged for whatever time the Zeppelin's take-off was delayed by adverse weather. Thus the profits of the voyage could be largely diminished. Heretofore the Zeppelin has been entertained free of charge at Lakehurst. The first strictly commercial trip with commercial charges, gave a good idea of the real cost of lighter-than-air transportation, a cost vastly under-estimated by laymen in the past.

Winnipeg Newspaper Union

(By Annabelle Worthington).

A stunning outfit for deb and the little sub-deb who follow closely in the styles of her debutante sister.

Style No. 3282 is printed tub silk that would appeal to any smart miss in its attractive dusty-pink tones. The shoulder and hipline bows are of plain faille ribbon in the deepest shade of the print.

The long-waisted bodice is caught with plaits at left hip beneath the bow, which makes the right side quite deep emphasizing its diagonal line. The gathered tiers of skirt are decidedly youthful.

This versatile model comes in sizes 12, 14, 16, 18 and 20 years.

It is dainty for afternoon in chiffon in coral-red shade.

Wool challis prints, printed dimity, printed batiste, pastel flat washable crepe silk, printed lawn and printed voile are smart.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

The Red Cross

High as God's mountain
Whose white, melting snow
Refreshes dry valleys
And grain fields below.

Deep as the love
Of the mother, who gave
Her son; that forever
Old Glory might wave.

Broad as the bosom,
Of blue seas, that rest
In His hand: Let us give
Not our "bit," but our "best."

The world is behind
And God is above
The Red Cross of Charity,
Mercy and Love.

The Changing Times

Conditions Nowadays On the Farm
Are Different According To This Informant

Today's farmer is changed from that of yesterday's; he is coming to be an oily individual who controls a lot of levers and lets the machinery do the sweating. He is more familiar with the monkey-wrench than he is with the pitchfork; and through the aid of the gasoline tractor, the nightmare of inability to get sufficient help for seeding has been largely banished. Spring work is no longer the hectic business it used to be. Moreover, when his day's work is through in the field, so is he; he doesn't have to spend half the night caring for horses. His wife notices the difference in setting just so many less places around the mealtable. — Lindsay Post.

Judge Kept the Evidence

An American lawyer of international reputation has been staying in London during the last few days. He told his friends how he went to some town in the South, where it was very hot, to plead a case. At lunch-time the judge asked him if he would like to join him. The lawyer accepted. The judge gave him some first-class whisky. "How did you get it?" he was asked. "Oh," said the judge with a chuckle, "we had a big bootlegging case here last week, and I kept the evidence."

Band of Intrepid Scientists To Penetrate Greenland In Order To Study Glacier Movements

To Enlarge Grain Elevators

Increasing Grain Handling Facilities In Western Canada

At the last session of the Federal Parliament of Canada \$1,800,000 was voted for increasing the grain handling facilities in Canadian Government storage elevators at Moose Jaw and Saskatoon, Saskatchewan, and for the construction of a new elevator at Lethbridge, Alberta, at a cost of \$900,000. The storage facilities at the Moose Jaw elevator are to be enlarged this year at a cost of \$450,000 and an addition to the one at Saskatoon is to cost \$450,000. Canada is well equipped with grain elevators. There are a total of 5,481 with a combined storage capacity of 358,255,000 bushels. With the exception of the huge terminal elevators at Fort William, Port Arthur, Montreal, Vancouver and other ports, nearly all our country elevators located at railway stations throughout the three prairie provinces — Manitoba, Saskatchewan and Alberta — the great grain producing area in Canada. Over 90 per cent. of the total wheat crop of Canada is produced between Winnipeg and the Rocky Mountains.

Co-Operative Associations

Organizations In Canada Now Reach Total Of 926

Co-operative associations in Canada number 926, according to the latest federal figures, with a total membership of 512,835, which includes the grain growers of the Prairies, the largest co-operative body in Canada, dairy farmers and fruit and vegetable growers of the eastern provinces. Apart from these there are some 26 co-operative distribution societies affiliated with a central co-operative union. There is also a number of consumers' co-operative societies outside the union of which the majority are in the western provinces.

RADIO EQUIPPED OBSERVATION CAR

JASPER PARK LODGE

The Canadian National Railways have blazed a pioneer trail in Canadian radio broadcasting and it again made history with the trans-continental broadcast from Jasper Lodge, Jasper National Park, on the occasion of the opening of the Lodge for this season. This was the first broadcast to be made from Jasper, in fact, it was the first time a radio programme has found its origin in the Canadian Rockies.

Irvin Plumm and his Jasper Park Lodge Orchestra, which has just commenced its sixth summer engage-

ment at the Lodge, supplied the instrumental music for the historic broadcast. Madame Gladys Bell Owen, of Regina, who was the principal soprano in the New York production of "The Miracle," and Sydney J. Hendra, tenor, of Edmonton, were the soloists.

The illustration above shows: Irvin Plumm and his Jasper Park Lodge Orchestra; a Canadian National Railways observation car equipped with combination radio and phonograph; the announcer before the "Mike"; Jasper Park Lodge.

Unusual Restaurant In Berlin

Walters As Well As Patrons Are Deaf And Dumb

A restaurant has just been opened in Berlin where complete silence rules in spite of the most animated conversation. From the outside nothing distinguishes this remarkable place from hundreds of other "Knippen." In most of these places there are also one or two bars for the hurried guest who requires no more than a drink and a "bite." Two similar bars faced me when I entered the deaf and dumb restaurant, but they are not used much. The deaf and dumb are not usually in a hurry, and although their quick gestures and facial expression often gave me the impression that they were excited, it is merely the need to express themselves by movements which creates the false impression of an excited crowd. Some of the patrons were having dinner, obviously in animated conversation; others had finished and were playing cards. All in deadly silence. Even the waiters were deaf and dumb, and the only sounds that could be heard were the clatter of plates and occasional tinkling of a coin.

Whitefish Fry For Western Lake

The recent dumping of 80,000,000 whitefish fry into Lesser Slave Lake should improve prospects for tourist fishermen, according to R. T. Rodd, supervisor of fisheries, just back from a tour over the grounds.

"Your husband is very well liked as a doctor?"

"Yes. His patients go to their death for him."—Karikaturen, Oslo.

GOOD OLD LAW OF AVERAGE

"The most important economic rule for business men to remember is that the sun of prosperity is always shining on some industry. Once you grasp economic principle you will best appreciate the meaning of that good old-fashioned word 'Stick-to-it-iveness'." Most businesses and localities get their full share of sunshine in due time. Give the old town a chance! The law of action and reaction teaches us that it is only a question of time before an improvement will take place. The chances of making good are as favorable in the industry that is depressed as the industry that is prosperous.

"In studying this economic principle, that the sun is always shining somewhere, business men should be very careful to keep an active attitude and not to fall into a passive attitude. Do not be a fatalist! Do not idly wait for the sun to break through the clouds; instead, punch a hole through the clouds and let the sunlight through."—Roger Babson.

NEGLECT WOMEN IN CHOOSING CANDIDATES

Women have enjoyed the franchise in Dominion affairs since 1917, though it was not until 1921 that the unrestricted franchise was given them. Still that is eleven years ago.

Add to that fact another, which is that women represent some 56 per cent, of the voting strength of Canada at the polls on July 28th.

Then consider that in all the 245 electoral divisions of Canada not a woman has been given a nomination by either of the chief parties in a "safe seat."

Miss McPhail, who has sat in the House since 1921, is Progressive, and even she—unless someone drops out before nomination day—is up against an uncertain three-cornered fight.

Half the seats in Canada are reasonably safe for one part or the other. That is, nomination is about tantamount to election. Both parties are pleading strongly for the votes of women, but obviously there has been no real concern on the part of the constituency organizations to see them in parliament.

MOTOR AGE BEHIND GRAIN SURPLUSES

Machinery displacement of horses and mules has much to do with the existing surpluses of grains on this continent and the grossly over-produced condition of the agricultural industry, declares a recently issued publication of the Horse Association of America.

As a partial remedy of the situation the publication urges that horses and mules be used wherever and whenever they are found as cheap of operation as motor driven vehicles.

It is claimed that the destruction of the normal increase in horses and mules through the substitution of automobiles, trucks and tractors has cut down the acreage needed for animal power production and maintenance from 107,162,500 acres to 52,905,000 acres in America.

LOCAL & GENERAL

Scratch Pads may be had at the Pioneer Office, 2 for 5 cents.

Mr. Dave Barr of Langdon, spent Sunday with Mr. and Mrs. J. Halton.

Mr. and Mrs. Yee Bow are rejoicing in the birth of a son.

Miss Winnie Studer spent Sunday at Sylvan Lake.

Mrs. W. G. Evans and family are spending a few weeks at Sylvan Lake.

Mr. and Mrs. McRae and Mr. and Mrs. Bert Fisher motored to Irricana on Sunday.

Mr. and Mrs. A. Weber of Fairview, visited over the week-end with Mr. and Mrs. E. Reitzel.

C. E. Reiber and R. L. Robson spent Sunday in Olds as guests of Mr. and Mrs. S. Reiber.

Mr. S. T. Halton of Cardston, spent Sunday with his brother, Mr. J. Halton.

Miss Wood of Toronto has been visiting her sister, Mrs. W. G. Evans, during the past week.

Mr. H. B. Adshead, M.P., of Calgary, spent Saturday with his son, Mr. C. H. Adshead.

Mrs. Weisgerber and Miss McKee of Black Diamond, visited with Mr. and Mrs. A. G. Studer last week.

Mr. and Mrs. Fred Hyde and family spent last week at Edmonton and were entertained at the Strand Hotel by Mr. and Mrs. Grant Park.

Mr. and Mrs. Costin of Calgary, called on Mr. and Mrs. C. W. Gibbs and Mr. Mrs. C. H. Adshead on Sunday.

Mr. and Mrs. J. Halton, Messrs. Ross Ford, Gene Axtell and Misses Clements and Simpson made a trip to Calgary on Saturday evening.

Mr. and Mrs. D. Campbell and son of Calgary, visited with Mrs. Campbell's parents, Mr. and Mrs. A. G. Studer on Sunday.

Mr. and Mrs. J. McCloy and Mr. and Mrs. J. Caithness made a fishing-trip to the Big Hole at Fallen Timber on Sunday, returning with a creelful of grayling.

At the convention of Alberta postmasters held in Calgary last week, Mr. Morgan of Didsbury was re-elected president of the association.

Mrs. W. Schaefer of Schaller, Iowa and Mrs. J. E. Woodke of Odebolt, Iowa, were visiting Mr. and Mrs. Lee Sanderman this week.

Melvin "Go-Getters" are holding a dance in Mr. E. Kreb's barn, five and one half miles west and one mile north of town, on August 1st. Good music by the Carstairs Joyboys. 30.2c

Mr. and Mrs. M. E. Petrequin of Chicago were visiting with the latter's parents, Mr. and Mrs. W. H. Chamberlain last week. Whilst here they made a motor trip to Banff and Lake Louise.

Miss Nohr, the marcelleure, wishes to announce that she has removed to the Leuzler Block above Hawkes' Store. Schoolgirls' marcel, 35c. and 50c. Ladies' marcel—50c. and 75c. Also finger-waving. 30.3p

A big dance will be held in the Opera House on Wednesday evening July 30th (Fair Day). An all-talking picture will be shown continuously from 6 to 9-30 p.m., to be followed by the biggest dance of the season. Clemens and Bellamy five-piece orchestra will provide the music.

Mrs. R. D. Bruce and children of Evansburg, have been guests of Mrs. Harmer for the past week. Mrs. Bruce is a sister of the late Lorna Moon of Hollywood, scenario writer for Metro-Goldwyn-Meyer productions, also author of "Dark Star" and other stories. "Dark Star" is at present being starred for filming in the near future, with Marie Dressler in Scotland, studying for the part of "Divot Meg." Mrs. Bruce herself, is a writer of some note, having written several short stories which have been published in magazines both in Canada and the United States. She has also won a few substantial cash prizes in magazine competitions.

LIVESTOCK SAVES
Without the Safeguard of Livestock Crop, Any Grain Country May Face Danger

China is in the grip of a food famine. Why are two million Chinese doomed to die?

The Kimberley press answers this by saying that they starve because they have no live stock. They farm scientifically, with crop rotation, yet they have no great reserve of food such as is represented by the flocks of America. If a land depends on its plant crops entirely, one crop failure is likely to be famine. But a livestock industry represents a huge reservoir of foodstuffs on which a country may draw.

Before livestock became an essential of general farming, famine conditions were likely to arise anywhere, as they frequently did.

The parts of United States where no livestock is kept, are the sections where the farmers have the hardest time to get along. The introduction and encouragement of diversified farming have been a prime mission in the work of agricultural schools and departments.

More than half the annual value of the farm products of America lies in cattle, hogs, sheep, horses, poultry, and by-products of these.

ADD TO WEED PRIZES SCHOOL AND FAIR EXHIBITS

The Alberta department of agriculture realizes that the collecting and mounting of weed plants by the boys and girls of the province is of inestimable value in teaching the general public to know common noxious weeds. E. L. Gray, field crops commissioner, says it has now been arranged that in order to increase the interest in weed collections, the prize money given for these at the provincial seed fair be augmented by the addition of \$10, \$6 and \$4 to the first, second and third prizes, respectively. These prizes have been \$3, \$2.75 and \$2.50 at fairs of recent years followed by fourth prize of \$2.25; fifth \$2.00; sixth, \$1.75; 7th, \$1.50 and eighth \$1.25.

In addition to the above increases there will also be offered a cup valued at approximately \$20.00, emblematic of a provincial championship in weed collections.

This re-arrangement of the provincial seed fair prize list follows the arrangement made some weeks ago whereby the first, second and third prizes arranged for at school fairs will be augmented by \$1, 75c and 25c, respectively.

PEAK OF TOURIST TRADE NOT REACHED

While United States tourists spend close to \$300,000,000 annually in Canada, this country's tourist expenditures in the United States are by far the greater, on a per capita basis.

During 1929 Canadian tourists spent \$91,000,000 across the border, a Canadian expenditure of \$9.10 per capita.

The per capita expenditure of the United States in Canada through tourist activity amounts to only \$2.33 per capita.

It is believed here that the right methods of fostering the tourist traffic to Canada—good roads and more accommodation—would swell the United States per capita expenditures to the same high proportions as the Canadian per capita expenditures in the United States.

If the United States expenditures on tourist activity in Canada reached the Canadian figure of \$9.10 per capita the total value of the trade to Canada would be \$1,137,500,000 annually.

A Vote for R. B. Bennett

WORLD HAPPENINGS BRIEFLY TOLD

On June 24, the King and Queen received the delegates to the Imperial Press Conference, in the throne room at Buckingham Palace.

British Columbia expects to benefit from the new Australian tariff just introduced in the Commonwealth House, extending a British preference to lumber.

Mr. Bennett Scott, the song composer whose "Take me back to dear old Blighty" was sung by soldiers all over the world, died at his home at Loraine Mansions, London, England.

Mr. and Mrs. Joe V. Illeneuvre, of Detroit, were burned to death when their airplane fell at the municipal airport, in Toledo, Ohio, and burst into flames.

President Hoover has approved transfer of the obsolete submarine P-12 from the navy to the U.S. shipping board which will charter the craft to Sir Hubert Wilkins for North Polar explorations.

F. E. Beattie, aged 50, an accountant in the Bank of Hong Kong and Shanghai, at Shanghai, disappeared from the "Empress of Russia," it was reported on the steamer's arrival at Vancouver. He was a passenger en route to Scotland with his wife.

Vincent Massey, retiring Canadian minister to the United States, who delivered the annual commencement address at the University of Michigan, Ann Harbor, was awarded an honorary degree of Doctor of Laws.

L. R. McGregor, new Australian trade commissioner to Canada, arrived at Victoria recently from Sydney with his wife and two children. He is particularly anxious to introduce Australian wines to Canada.

Switzerland Is Prosperous

Has Population Of Over 4,000,000 and People Are Good Workers

Switzerland, which has an area of only 19,950 square miles, has now a population of roundly 4,000,000 to which it has risen from 3,300,000 in 1900. Small as the country is, it has 30 towns of over 10,000 people. While the population has increased the mountainous regions are being deserted. The general growth of Switzerland is the more remarkable for the fact that one-fifth of the whole territory is mountainous and unproductive. Switzerland is almost destitute of native raw materials and yet she has 600,000 persons engaged in productive industry. In fact, it is not too much to say that if all the world worked as well and as effectively as Switzerland, it would be a happier place. Switzerland is never troubled by war or rumors of war.

Canada's Military Force

Consists Of 401 Officers and 1,067 Non-Commissioned Officers

Canada's permanent military force at the present time comprises 3,943 all ranks of whom 401 are officers and 1,067 non-commissioned officers. At headquarters in Ottawa there are nine naval officers, forty-nine military officers and thirty-one air officers. There are also at headquarters a total of 104 other ranks.

Four hundred and forty-three civilians are employed of whom 400 are permanent.

The cost of administering the headquarters totals \$1,425,311 annually.

HOW THE RICH FARMER EQUIPPED HIMSELF AS A PROTECTION FORM MOTOR-ACCIDENTS IN THE CITY.—Lustige Sachse, Leipzig.

W. N. U. 1844

Many Accidents Caused By Neglected Cars

Carelessness Allows Defects To Develop In Mechanical Parts

Automobile owners in the United States who neglected to keep their cars in good condition were responsible for five thousand of the lives lost in traffic accidents during the last calendar year. This estimate is made by the framers of the report recently submitted to the National Conference on Street and Highway Safety at Washington, by its committee on the maintenance of motor vehicles. To learn that fully fifteen per cent. of the traffic fatalities recorded in 1929, are actually traceable to lack of proper care of cars is an enlightening disclosure. The studies of the committee into causes of motor accidents have convinced its members that stricter official inspection of all automobiles is urgently needed.

Essentially this report charges that because of improper maintenance defects are allowed to develop in vital mechanical parts of a car; brakes and steering gear are allowed to become dangerously worn or drop out of adjustment; horns, windshield wipers, rear lights and headlights uncared for become ineffective. A steady increase in driving speeds in the last few years has served only to increase the hazards created by the negligence of those who own cars and permit them to be operated when they are unfit to be driven on public highways. The committee recommends legislation that will enforce periodic inspection in States where such a precaution is not now taken. It suggests that in the case of old cars that have been resold several times a certificate of inspection should be required when drivers' licenses are issued.

Pulsating Stars

Theory Advanced That Certain Stars Do Not Rotate

A theory that certain stars do not rotate, is presented to the American Association for the Advancement of Science, by Dr. Ross Gunn, of the Naval Research laboratory. These non-spinning stars are those which pulsate, that is, which expand and contract. Some of the pulsating stars have the habit of enlarging their diameters millions of miles. They beat like vast fairy hearts.

One class of pulsating stars, the Cepheid variables, are the "light-houses" of the sky, that is, they enable astronomers to calculate the vast distances of space. Dr. Gunn's theory comes from study of magnetic fields about stars, especially those about the pulsating suns.

(By Annebelle Worthington).

TEN YEARS' GROWTH OF TOURIST TRADE

The rise in the value of Canada's tourist trade during the last ten years has been little short of phenomenal. Estimates of the expenditures made in the Dominion by tourists from other countries run back as far as 1920, and it will be found that during this ten-year period, 1920-29, inclusive, tourists from abroad are estimated to have spent in Canada a total of roundly \$1,682,000,000.

Such a sum of money is almost staggering, and it is difficult to find comparisons enabling us to realize its immensity. Perhaps the most startling comparison that could be made is to place this sum alongside the enormous outlays that Canada was called upon to make in connection with the Great War. According

to the Federal Public Accounts the total expenditure made by the Dominion Government under the heading "War and Demobilization" is placed at roundly \$1,695,000,000.

Thus the expenditures made in Canada by tourists from other countries within the last ten years are estimated at an amount which falls only a few thousand dollars short of equalling Canada's immense outlays for war and demobilization purposes. It is not to be wondered at that the highest financial authorities in Canada have recently made it a special point to direct public attention to the growth and possibilities of this comparatively youthful, recruit to the ranks of the Dominion's major economic interests.

Bacon Contest

Summer Bacon Litter Competition To Be Held In Saskatchewan

The Saskatchewan Livestock Branch, with the co-operation of the Dominion Live Stock Branch, is fostering a summer bacon litter competition as a stimulus and a first rate benefit to the swine industry of Saskatchewan. According to J. G. Robertson, Live Stock Commissioner for Saskatchewan, the province will be divided into five parts for the purpose of this contest, over which the prize money will be equally distributed. Among the conditions of entry it may be noted that litters must be farrowed between April 1st and July 1st, and may be out of a grade or a purebred sow, but must be sired by a registered bacon type boar, and at least nine pigs must be raised to marketing age.

The Central Railroad of Peru crosses the Andes at one point at 15,865 feet above sea level.

Trade With Russia

Canada's Exports To Soviet Russia Are On the Increase

"Soviet Russia may be said to be the only country, outside of Germany, in Central Europe which imports direct the bulk of its requirements of Canadian products," writes L. D. Wilgress, Canadian Trade Commissioner in Hamburg, in the "Commercial Intelligence Journal." "Other countries in this territory, such as Czechoslovakia, Austria and Poland, consume important quantities of Canadian goods, but these are usually consigned in the first instance to Hamburg and for this reason appear in the Canadian trade returns among the exports to Germany. Canada's exports to Soviet Russia in 1929 increased by \$1,137,068."

The arctic tern nests 11,000 miles from where it spends its winters.

The simplest element known to man is the hydrogen atom.

Moose Pose for Photo

In the north woods at Metagama, North Ontario, where M. U. Bates runs his camps, moose are unusually plentiful this spring. Mr. Bates was visiting one of the camps the other day and looking in a cabin found two infant moose asleep in one of the bunks. He lifted them out but they came back to the veranda and, finding a sunny spot, had another nap. The moose were quite tame and are here shown being posed for a photograph. The snapshots were taken within a mile of the Canadian Pacific Railway tracks near Metagama.

Desert Will Become Garden

Young Engineer Raising River Jordan To Water Desert Land

A miracle is recorded in the Bible of the Jordan dividing at the word of the prophet. The miracle is being repeated now at the word of an engineer. Sceptics or atheists must believe what they can see.

Rutenberg, the engineer, is lifting the Jordan bodily and throwing it just where he wants it to fall, like the giant of fairy tales who lifts up mountains and hurls them at the heads of his enemies. And in a few years the oldest of countries will be electrified and the most dreary of deserts will become a green garden.

On the left are the forbidding and barren hills of Transjordan. Pedestrians are a rarity on the road to Jisr. After a few miles the sound is heard of a pick striking stone. There is a loud braying of donkeys and the puff puff of a small steam engine. And out of the desert the traveller falls into an oasis of concrete, the Rutenberg miracle.

Workers stop their work to gaze at the European stranger.

"It is all very simple," says an enthusiastic young engineer, who is helping turn a hideous desert into gardens of loveliness. "All you have to do is know how to do it and then see that it is done. For miles around there is land rich in chemical fertilizer. The Dead Sea has been depositing it here for centuries. But there is no water and so the land is dead, deserted and desolate."

"But if we raise the Jordan thirty feet we shall be able to turn the desert into a paradise. It is quite simple. You see that concrete wall that goes sheer down, that is the first step. A little further along you will find another. It is believed that the service Rutenberg is doing Palestine by watering the desert places is greater than by supplying it with electricity."

A Romantic Province

Colorful Pages Of Pioneer History In the West

The oldest of the Prairie provinces has had a romantic history. It gave birth to the romance of the West with its Red River carts, an association which colors the pages of pioneer history in the West. From what was Fort Garry to what is today Winnipeg, is in itself a monument of a story replete with adventure and achievement. It is the story of early beginnings ending in great accomplishments, with the torch lit by the first pioneers now illuminating a great and prosperous province. July 15 will be a day of great pride to the people of Manitoba with what has been done serving as an incentive to further achievement, with the spirit and zeal of the early pioneers carried on to meet the needs of the modern day.—Lethbridge Herald.

Wood Produced From Cotton

New Material Has Been Perfected By Man In England

Synthetic wood produced from compressed and hardened cotton material has been perfected by a Clerkenwell, England, man. It is said to be indistinguishable from mahogany, oak, or any other wood, and can be used in making furniture and all kinds of house fixtures. Its cost is much less than ordinary wood and its life will be as long, the inventor says. It may be moulded into any warp. It is expected to reduce the cost of houses as well as of furniture.

In Czechoslovakia there are fourteen women in Parliament, ten deputies and four senators.

"Were you driving for the first time?"
"No—the last."—Hummel, Hamburg.

WRIGLEY'S

When you need new energy, when you are hot and mouth is dry—pep up with Wrigley's—it moistens mouth and throat.

The increased flow of saliva feeds new strength to the blood, you can do more—you feel better.

CHAPTER XVIII.—Continued.

The doctor chuckled, glanced shrewdly at his companion, and replied: "I don't imagine that those rides were a real sacrifice to my assistant!"

"If they were," retorted Charmian with a dimple, "he disguised the fact with proper gallantry; but I'm none the less grateful to him. It's a long walk to District Four when the mercury hovers around zero, Doctor; and Grandma worries."

"I wish you didn't have to leave her, Charmian. The days must seem long now that winter has set in."

"I fear they seem a great deal longer than she admits," replied the girl. "Grandma's so patient and uncomplaining. But I can't give up the school, Doctor, even with the welcome board money coming in each week. I know we're foolish to cling to the old house the way we do. I might, in the name of common sense, be willing to part with it and break my heart, but I can't break Grandma's; and no other home would seem her own."

The old man was silent for a moment, and then said: "George K. tells me the house is really yours, Charmian."

"It is. I thought you knew that Grandma deeded it to me a year ago. She got the idea that it might save trouble for me after she goes; and I let her do it because it made her happier."

They rode half a mile in friendly silence. It was beginning to snow, the big flakes drifting down lazily and settling on the windshield.

"I've been thinking," said the doctor at last. "I can't help worrying about you, child, because I know, you see, that I shan't always be on hand to advise you when you may need advice. An idea came to me in the

night, an idea that might not suggest itself to you, and I'm telling you now so that if the time comes when you must part with the old homestead, you could consider it. It's this: If you sell the place, don't part with your great-grandfather's little office. You could live there comfortably, you and Grandma. With a kitchen and bathroom added at the back it would make a cozy enough home; and it would be home, in a way, to both of you. Don't forget it, child, if I'm not here to remind you."

"But you will be! I won't admit anything can ever take you from us, Doctor Howe—we need you so. But I'll remember your suggestion. It's a good one, only—what would your young M.D. do for an office?"

"That point," answered the doctor, "will take care of itself."

Another moment of stillness followed; then he said, briskly, as if making a decision, "I think I'll confide in you, Charmian. You know, of course, that I haven't saved much money. I've had nothing to save for; and I've done my work for the work's sake, and the love I have for my loyal patients. I've kept my house in repair and paid my bills, and, providing there was enough for that, I haven't hounded folks if they paid slowly, or even if they didn't pay at all. So you see, child, I'm no John D."

"I see," said the girl, wondering where this confidence was leading.

"I wonder how much John Carter has told you about his life," said the old man unexpectedly.

"Very little," replied Charmian, still puzzled.

"Possibly then, you don't know that as a boy he had almost everything he desired. His people were wealthy, and John and his sister might easily have been spoiled. They went to exclusive schools, and later mingled with what society calls 'the best,' meaning, I suppose, the most stylish. John had always wanted to be a doctor, but he wasn't strong and his father, knowing it to be a hard life, objected. The boy persisted, however, and after graduating from Harvard went into Medical School. In his second year there, his father died—a shock caused by financial worry. Though no one had guessed it, things had been going badly with his business. There was enough left to pay his creditors and save a few of the family heirlooms, nothing more. Two weeks later John's mother died in her sleep."

"Oh, that poor boy!" broke in Charmian with compassion.

"Poor boy, indeed," went on the doctor, "for he loved both parents dearly. The sister, fortunately, had married well. John made his home with her, and went on studying—earning his own way—working too hard, and risking his not too robust health. That was his reason, my dear, for taking a country practice. He needs fresh air, and to get away from persistent invitations that would mean late hours. There are enough late hours in the life of the average doctor, without adding to them in society."

"He will certainly escape society in Wickfield!" smiled Charmian.

"Which is what he wants, and what brings me back to my starting point," the old man continued. "The boy is doing well. The Wickfield people like and respect him. He understands them, and takes hold as I'd hoped he would. So, though of course he doesn't guess it, when my time comes, Charmian, he will inherit what little I have to leave: a roof over his head; an office that folks are used to coming to; and the trust of my friends and patients. So you needn't worry about leaving him without an office if you and Grandma decide to make the change. He'll be provided for. All he needs is a good wife; and I'm wondering, . . ."

The doctor paused, turning to look at Charmian so intently that her color rose.

"There are photographs of two perfect peaches on his bureau, and, according to Grandma, another in his watch!" she retorted lightly.

"And what is there in his heart, my dear?" asked the old man.

"How should I know?"

"Well," said the doctor, shaking his head, "if a red-blooded young fellow can live under the same roof with Charmian Davis, and not find something in his heart, I am mistaken. He should have been on his knees to her before this."

Charmian laughed as she responded: "I understand that they don't do it that way these days! And I've

been told that a doctor's wife has a hard life."

"I think you could stand it," smiled her old friend. "I shouldn't want the lad to live alone, Charmian, as I have. He's like a son to me."

She ventured a little laugh.

"I believe that I regard him that way myself! It's a pleasure to keep his meals hot—he's so grateful."

"I'd rather you regarded him differently," said the doctor, sighing, "that is, unless—Dear me! Here we are at my destination. The widow Smithson has got the gripe, I sha'n't be long, child."

The girl glanced up, suddenly conscious of her surroundings. They had stopped before the small, brown, shabby cottage where Jim Bennett had once collected interest money—the place where Charmian had called him "Shylock."

CHAPTER XIX.

As the doctor went within, Charmian's thoughts drifted back to that ride with Jim—to all the changes that had come since, and to those that were destined to come before many years. The old man's confidence had stirred her deeply. He was younger than her grandmother, but he had lived a harder life and was breaking earlier. Probably he knew more about his condition than he had told her. The end might be nearer than it seemed; and he was "putting his house in order." It was like him to be ready when the call came; and to plan so that his care for her welfare went even beyond the grave.

Charmian shivered, not from cold, but from a sense of what life would be to her when all these natural changes had taken place. Even Grandma, happy as she was, could not go on for ever. What would there be for her in Wickfield without Grandma, the old doctor, and even Jim? There was John Carter, to be sure. Perhaps . . .

The girl's lovely color deepened just a trifle at the thought of where this reverie was leading. Then a child's fretful cry from within the cottage brought her back to the scene before her. The house seemed even shabbier than she remembered it—cold and uncomfortable in its wintry setting. A broken windowpane was stuffed with an old shawl. The shades at the windows were torn and sagging. What would such people do without a kindly counsellor like Doctor Howe? Would his successor be as lenient to unpaid bills—or would he collect relentlessly, as Jim Bennett had collected that interest for the bank?

No, Charmian's heart answered, John Carter would not be an inhuman creditor. There was a warm kindli-

ness about him that precluded such a thought. But, spoke up a loyal voice within her, Jim was kind also. Only in business . . . Did all business men care less about the human side of life? . . . Did days spent thinking in terms of money, blind one after a time to other needs?

She stirred as the door of the cottage opened and closed on her old friend; but he came to her side of the car and asked a question:

"Have you got Jim Bennett's address on the tip of your tongue, child? I can't remember it."

(To Be Continued.)

STURDY CHILDHOOD

The sturdy child—the bright, active little chap is the one everybody loves. It is only the sickly, fretful child who is not attractive. It is the birthright of every child to be sturdy and well—to be able to make every one admire him. Therefore, mothers, if yours is not attractive it's your fault, not his. He must be ailing and it is up to you to see that he gets relief—that he is given a medicine that will quickly make him well and keep him well.

Baby's Own Tablets are especially designed for infants and young children. There is nothing to equal them for correcting the irregularities of the stomach and bowels—the cause of most of the ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Chinese telephone exchange of San Francisco, Calif., has 2,800 subscribers; two of the operators have served for 20 years.

Keep Douglas' Egyptian Liniment handy. A sure, speedy remedy for burns, sprains, felons, blood poisoning, soft corns, warts, scald feet. Invaluable for inflammation and muscular rheumatism.

Preference For Blacks

A sheep slayer that attacks only the black sheep in the flock is reported from Cheyenne, Wyoming. This freak killer went through a flock and killed seven black sheep in one night, but failed to touch a single white one.

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Little Helps For This Week

"The Lord shall be unto thee an everlasting light."—Isaiah lx. 19.

There is no day so dark But through the murk some ray of hope may steal, Some blessed touch from Heaven that we might feel

If we but choose to mark.

—Celia Thaxter.

Let us all be sure that all is well, whatever comes, while we trust and stand fast and strive, and only hope— and rightly hopeless—when we want what we are in no wise willing to earn. The glory and the glow of life come by right living. So then, while we may not know what trials wait on any of us, we can believe that as the days in which Job wrestled with his dark maladies are the only days that make him worth remembrance, and but for which his name had never been written in the Book of Life; so the days through which we struggle, finding no way, but never losing the light, will be the most significant we are called to live.—Robert Collyer.

Minard's for Falling Hair.

Again Break Records

Homestead filings at the Edmonton land office have again shattered all records. During April 529 homesteads and 19 soldier grants were taken up. The preceding April exceeded any previous month with 349 homesteads and 8 soldier grants.

YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl chum told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby boy."—Mrs. J. B. STALKER, Bancroft, Ontario.

W. N. U. 1844

Melvin Notes.

Carlton Leeson, with other boys, is spending the week at Sylvan Lake.

Mrs. Carlson and Gladys are holidaying at Sylvan Lake.

Messrs. Ernie Fisher and Ross Youngs, with lady friends, motored to Sylvan Lake on Sunday.

Mr. and Mrs. Wm. Dean and family of Gadsby, spent a few days this week at the home of Mr. and Mrs. Leeson.

Mr. and Mrs. A. Krebs and family motored through the east country on Sunday, visiting Mrs. Krebs' first home in Alberta.

We hope to see the same faces again and more, too, at our next dance in Mr. E. Krebs' barn on August 1st. Lunch served by the club. See other notice in locals.

Mr. Fred Cody of Toronto called on Mr. and Mrs. Chas. Youngs on Thursday on his way to the coast. Mr. Cody was in the Traders Bank in Didsbury in 1910 and is now with the Imperial Bank, Toronto.

Messrs. Chas. Youngs and Fritz Krueger motored to Three Hills on Sunday, calling on Mr. H. Pearson and dining with him. They report the east country looking more prosperous than at the same time last year.

The "Go-Getters" dance proved a great success. It was to have been held in Mr. Leeson's barn but was transferred to Mr. E. Krebs' barn. The lucky winner of the box of chocolates, donated by the Didsbury Bakery, was Mr. Chas. Mortimer who picked No. 52. On behalf of the club, we wish to thank the Didsbury Bakery for their donation. The box of chocolates netted the club \$25.80.

Evangelistic meetings begin in Cremona Hall on Sunday next, under leadership of Rev. C. J. Hallman and Rev. A. Habermehl.

Jersey Shipments From Didsbury

There have recently been several shipments of purebred Jersey cattle made by Norman S. Clarke. Two head of heifers were shipped to W. G. Smith of Metiskow, Alberta, two head were placed at Millett and a carload went forward to Edmonton where they were distributed on the St. Paul Line. One valuable heifer went to Opal, nine head to Radway and two heifers and two bulls were shipped to St. Paul des Metis.

One of the bulls for St. Paul is a Didsbury calf bearing the name of Didsbury St. Mawes Cid. He is said to be an outstanding young animal and from the high-producing St. Mawes strain. Reid Clarke was in charge of the shipment and has not returned from St. Paul, which is nearly four hundred miles from Didsbury.

Fontains Julietta, one of the purebred Jersey cows that is expected to set up a fine record, recently freshened with twins. They were bull-calves and have already been disposed of by Mr. Clarke. D. C. Carver purchased one and the other went to Olds to a boys and girls club there.

Most every Sunday now finds a crowd of people in the pasture at Mr. Clarke's farm, looking at the Jerseys. Visitors have come from Radway, Millett, Edmonton, Wetaskiwin, Calgary and many other places. All are agreed that the Didsbury district is one of the best in Alberta and after looking at the purebred Jerseys we now have here, most farmers decide these economical producers are the breed for them.

A shipment of twenty heifers, one mature cow and three young bulls was unloaded here on Saturday last. They arrived from Washington, being shipped in bond to Calgary. Reid Clarke was in charge of the unloading, as his father was holidaying at Banff when the carload was spotted in the stockyard siding. There are at the present time over sixty head of purebred Jersey cows, heifers and bulls at Norman Clarke's farm, west of town.

Drastic Cuts in Wheat Pool's Grain Advances

Initial payments for the 1930-31 grain crop have been set by the Canadian Wheat Pool. Far down from the values set a year ago for the west's crop, the first payments on all grain delivered to the Pool on July 16th and thereafter, are as follows:

Wheat: 70 cents per bushel on No. 1 Northern, Fort William.

Barley: 25 cents per bushel on No. 3 c.w.

Oats: 30 cents per bushel on No. 2 c.w.

Rye: 30 cents per bushel on No. 2 c.w.

Flax: \$1.25 per bushel on No. 1 n.w.

July 15th is "cut off" date for the 1929-30 pool, so that all grain delivered after that date is credited to the 1930-31 pool. The initial prices were announced by the central board of the Central Selling Agency of the Canadian Wheat Pool.

The Weight Test

Shows Gum-Dipped Cords are Stronger-Tougher

HERE is a test which easily proves the value of Gum-Dipping---the extra patented Firestone process of saturating and insulating every fibre of every cord in a Firestone tire with rubber to eliminate internal heat and friction---the greatest enemy to tire life.

A two-ounce weight is suspended on the end of one strand of a cord (a) taken from an ordinary tire. The strand breaks in 15 seconds. A similar weight is suspended on a Gum-Dipped strand (b) taken from a Firestone tire---it remains unbroken for 45 seconds---three times as long!

Let your nearest Firestone dealer equip your car with a set of these stronger, tougher, more dependable tires that hold the world's records for mileage and endurance. See him to-day.
